Professional Profile

I am an enthusiastic and productive person. I like the teamwork in an honest environment and with effective communication. I have a good resolution capacity, contributing ideas to projects and above all being focused on the objectives set and delivery dates.

Even though my years of experience are focused on other areas, if those are articulated with programming knowledge, I am ready to face the challenge of my first work experience as a Programmer.

Work Experience

2022 - Current	Full-Stack Developer. GoCode
2017 - 2022	Others. Customer service, administrative assistant, store cashier
